

SkySim Deception Package I

SkySim Deception Package I

The Deception Package I enhances the SkySim radar simulator by integrating various jammers. Paired with FreeScopes, including the FreeScopes Defense modules [Disturbance & Filtering](#) and [Analysis I & II](#), it enables practical training in countermeasures against electronic warfare attacks.

FEATURES

- Spot Jamming
- Barrage Jamming
- Range Deception Jamming
- Range Gate Pull-Off

PREREQUISITES

- [FreeScopes Basic I](#)
- [FreeScopes Basic II](#)
- [FreeScopes ATC I](#)
- [FreeScopes ATC II](#)

**Military Training Systems
for Military Academies &
Training Centers**

**The Global Supplier of
Military Training
Equipment from Radars to
complete Defense
Labs**

- Cloud Server
- Server Module

EXTENSIONS

- FreeScopes ATC Disturbance Filtering and Analysis I (recommended)
- FreeScopes ATC Disturbance Filtering and Analysis II (recommended)
- 8 GHz Pulse Radar

From Basic to AI-driven Sensing - SkyRadar Paves the Way

SkyRadar offers the world-wide most comprehensive range of training systems for digital signal processing
