

PASSENGER MASK TEST SYSTEM

Are you ready to offer passenger mask test services?
Save your customers money with tested masks vs buying new!

The AMI **Passenger Mask Test System** (Breathing Simulator) automates the testing of passenger masks. It is a tabletop unit running Windows software that lets the operator set key pass/fail limits.

System Features

- User Programmable
- Tests BE Aerospace and EROS/AVOX Masks
- Stored Programs
- Control of Breathing Rates
- Stored Test Reports

System Tests

- Inhalation and Exhalation Tests
- Oxygen Concentration
